Chang Min Park

University at Buffalo, The State University of New York
cpark22@buffalo.edu • +1 (716) 598-7331 • http://www.beyondthegeek.com/

INTERESTS

Secured Image Display using Trusted Execution Environment (TEE), Systems Challenges in Mobile Systems, Automated Software Analysis, and UI Testing.

TECHNICAL SKILLS

ARM TrustZone, Android Internals and App Development, Bytecode Instrumentation Tools (Soot), Firebase Realtime Database, Java, Python, C, and Linux OS

EDUCATION

University at Buffalo, The State University of New York

- Ph.D. in Computer Science and Engineering — Aug '17 – Present
  - Advisor: Prof. Steven Y. Ko
  - Focus: Systems Challenges in Mobile Computing
- B.S. in Computer Science — Aug '11 – May '17
  - Magna Cum Laude
  - Summer '12: Study Abroad Program at Yonsei University in Republic of Korea
  - Jun '13 – Mar '15: Served Military Service in Republic of Korea

Relevant Courses: Advanced Computer Systems, Advanced Programming Languages, Operating Systems, Distributed Systems, Realtime Embedded Systems, Modern Network Concepts, Data Intensive Computing, Computer Security, Algorithms Analysis & Design, VLSI Electronics, and Theory of Computation.

RESEARCH OVERVIEW

Through my undergraduate and graduate studies, my research has focused on mobile systems.

- **Rushmore** [Under submission] is a system that securely displays static or animated images using TrustZone. The core functionality of Rushmore is to securely decrypt and display encrypted images from a trusted party on a mobile device.
- **Gesto** [EICS '19, PACM-HCI, Best Paper Honorable Mention] is a system that enables task automation for Android apps using gestures and voice commands. Using this system, a user can record a UI action sequence for an app, choose a gesture or a voice command to activate the UI action sequence, and later trigger the UI action sequence by the corresponding gesture/voice command.
  Link: http://beyondthegeek.com/portfolio/gesto-eics-19/
- **Mimic** [ICSE '19] is an automated UI compatibility testing system for Android apps. Mimic is designed specifically for comparing the UI behavior of an app across different devices, different Android versions, and different app versions.
  Link: http://beyondthegeek.com/portfolio/mimic-icse-19/
- **Reptor** [MobiSys '17] enables open innovation in mobile platforms. Our technique allows third-party developers to modify, instrument, or extend platform API calls and deploy their modifications seamlessly. The uniqueness of our technique is that it enables modifications completely at the app layer without requiring any platform-level changes.

RESEARCH EXPERIENCE

University at Buffalo, The State University of New York

- Ph.D. Research Assistant, RMS Lab — Aug '18 – Present
- Undergraduate Research Assistant, RMS Lab — May '16 – Aug '17

TEACHING EXPERIENCE

University at Buffalo, The State University of New York

- CSE486/586: Distributed Systems — Jan '20 – Present
- CSE421/521: Operating Systems — Aug '17 – May '18

HONORS & AWARDS

- Best Paper Honorable Mention Award — Jun 2019
- UB SEAS Dean's Fellowship — 2017
- CSE Undergraduate Award for Research, University at Buffalo — May 2017
- Dean's List, University at Buffalo — 2012
