

Chang Min Park

University at Buffalo, The State University of New York
cpark22@buffalo.edu • +1 (716) 598-7331 • <http://www.beyondthegEEK.com/>

INTERESTS	Systems Challenges in Mobile Systems, Automated Software Analysis, and UI Testing.
TECHNICAL SKILLS	Android Internals and App Development, Bytecode Instrumentation Tools (Soot), TrustZone, Firebase Realtime Database, Java, Python, C, and Linux OS
EDUCATION	<p>University at Buffalo, The State University of New York</p> <ul style="list-style-type: none">■ Ph.D. in Computer Science and Engineering Aug '17 – Present<ul style="list-style-type: none">• Advisor: Prof. Steven Y. Ko• Focus: Systems Challenges in Mobile Computing■ B.S. in Computer Science Aug '11 – May '17<ul style="list-style-type: none">• Magna Cum Laude• Jun '13 – Mar '15: Served Military Service in Republic of Korea <p>Yonsei University, Republic of Korea</p> <ul style="list-style-type: none">■ SUNY Study Abroad Program Summer '12 <p>Relevant Courses: Advanced Computer Systems, Advanced Programming Languages, Operating Systems, Distributed Systems, Realtime Embedded Systems, Modern Network Concepts, Data Intensive Computing, Computer Security, Algorithms Analysis & Design, VLSI Electronics, and Theory of Computation.</p>
RESEARCH OVERVIEW	<p>Through my undergraduate and graduate studies, my research has focused on mobile systems.</p> <ul style="list-style-type: none">■ Gesto [EICS '19, PACM-HCI, Best Paper Honorable Mention] is a system that enables task automation for Android apps using gestures and voice commands. Using this system, a user can record a UI action sequence for an app, choose a gesture or a voice command to activate the UI action sequence, and later trigger the UI action sequence by the corresponding gesture/voice command. Link: http://beyondthegEEK.com/portfolio/gesto-eics-19/■ Reptor [MobiSys '17] enables open innovation in mobile platforms. Our technique allows third-party developers to modify, instrument, or extend platform API calls and deploy their modifications seamlessly. The uniqueness of our technique is that it enables modifications completely at the app layer without requiring any platform-level changes. Link: http://reptor.cse.buffalo.edu/■ Mimic [ICSE '19] is an automated UI compatibility testing system for Android apps. Mimic is designed specifically for comparing the UI behavior of an app across different devices, different Android versions, and different app versions. Link: http://beyondthegEEK.com/portfolio/mimic-icse-19/
RESEARCH EXPERIENCE	<p>University at Buffalo, The State University of New York</p> <ul style="list-style-type: none">■ Ph.D. Research Assistant, RMS Lab Aug '18 – Dec '19<ul style="list-style-type: none">• Project: Mapping UI Events to Gestures and Voice, and Automated Testing of Mobile Devices.■ Undergraduate Research Assistant, RMS Lab May '16 – Aug '17<ul style="list-style-type: none">• Project: Android Platform API Virtualization
TEACHING EXPERIENCE	<p>University at Buffalo, The State University of New York</p> <ul style="list-style-type: none">■ CSE486/586: Distributed Systems Jan '20 – Present<ul style="list-style-type: none">• Fundamental Techniques of Industry's Most Critical Distributed Systems■ CSE421/521: Operating Systems Aug '17 – May '18<ul style="list-style-type: none">• Design and Implementation of Operating Systems

HONORS & AWARDS

- Best Paper Honorable Mention Award Jun 2019
Proceedings of 11th ACM SIGCHI Symposium on Engineering Interactive Computing Systems (EICS)
- UB SEAS Dean's Fellowship 2017
For exceptional graduate students who have potential for an outstanding graduate career
- CSE Undergraduate Award for Research, University at Buffalo May 2017
Awarded to one graduating senior who has done exceptional research with a UB CSE faculty
- Dean's List, University at Buffalo 2012

ACTIVITIES

Tau Beta Pi Engineering Honor Society, University at Buffalo

- Member 2016 – 2017
